The most current informations in software patents are found in the Net. But in view of the huge amounts of data, some readers prefer to have everything on CD so as to be able to read and print the texts without pressure at home. We have compiled such a CD and are trying to keep it up to date.

## Contents

Intevation GmbH<sup>1</sup> has in May 2000, for the occasion of the hearing at the German Ministry of Economics<sup>2</sup>, put together a *introductory CD* (German only) for FFII. You can order a copy from Intevation<sup>3</sup>.

Moreover, we press a quarterly disk edition (CD, DVD) of our Swpat archive, including patent descriptions, priority proofs and net mirror, which is sent out to various libraries and interested specialists.
